Poly Studio E70 Camera

Contents

Introducing Poly Studio E70

Poly introduces the Poly Studio E70 USB camera, a 4K dual-camera solution supported on Poly G7500 and Studio X50 video systems and with Poly G10-T for Microsoft Teams Room (pending Microsoft Teams certification). The camera includes microphones for audio pickup and full speaker and group framing capabilities and video coverage for up to 7.6 m (25 ft).

The following are a list of features available with Studio E70:

- Speaker and Group Framing
- Motorized Privacy Shutter
- Lens Desktop Support

Speaker and Group Framing

Speaker framing enables Studio E70 to determine which participant is actively speaking. The camera then frames the active speaker when transmitting video to the far end. Group framing enables the camera to automatically frame all in-room meeting participants to display all participants to the far end.

Motorized Privacy Shutter

The dual camera has a motorized privacy shutter that automatically opens or closes depending on the state of the connected system. For example, the shutter automatically closes when the video system is idle, or the camera is disconnected from the system.

Poly Lens Desktop Support

Users can onboard a Poly Studio E70 camera with Poly Lens Desktop to customize settings and update software.

Release History

Release History

Release	Release Date	Features
1.0.2	August 2021	Initial release of Poly Studio E70 USB camera.

Security Updates

Please see the [Security Center](#) for information about known and resolved security vulnerabilities.

Products Tested with this Release

Poly products are tested extensively with a wide range of products. The table below lists the products that have been tested for compatibility with this release.

Poly strives to support any system that is standards-compliant, and Poly investigates reports of Poly systems that do not interoperate with other standards-compliant vendor systems.

Poly recommends that you upgrade all of your Polycom/Poly systems with the latest software versions. Any compatibility issues may already have been addressed by software updates. See [Poly Service Policies](#) for the Current Polycom Intraoperability Matrix.

Note that the following list is not a complete inventory of compatible equipment, but the products that have been tested with this release.

Products Tested with this Release

Product	Tested Versions
Poly G7500	Poly VideoOS 3.6.0
Poly Studio X50	Poly VideoOS 3.6.0
Poly G10-T	1.2.0

Known Issues

The following table lists known issues in this release.

> **IMPORTANT:** These release notes do not provide a complete listing of all known issues for the software. Issues not expected to significantly impact customers with standard voice and video conferencing environments may not be included. In addition, the information in these release notes is provided as-is at the time of release and is subject to change without notice.

Known Issues

Category	Issue ID	Description	Workaround
Video	EN-209852	Video flickers due to mixed lighting conditions with very bright outdoor lighting and 50hz indoor lighting.	Minimize the amount of natural sunlight in the room.

System Constraints and Limitations

There are no limitations and constraints when using this product.
